

Program Overview

Background

The Government Technology(GovTech) Agency as a lead agency for digital transformation is actively seeking to create a vibrant startup ecosystem in the country alongside addressing its current challenges faced by the rapid transformation within the digital sector. To this end, the Agency is facilitating interested tech startups to avail the Microsoft 'Founders Hub' program. The program is relevant to tech startups owning tech based companies dealing with development of a software-based product or service that will form a core piece of current or intended business - this software must be owned, not licensed.

Therefore the Agency now invites eligible startups to kindly register in the link below on or before 4th October 2023.
